Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20-25 and 46-51 are rejected under 35 U.S.C. 102(b) as being anticipated by Hurlburt (U.S. Patent 891,174).

Hurlburt discloses a method of providing a lid (5) with a plurality of interlocking structures (6, 9) having projecting portions that extend above and below (Figure 3) a shoulder (4) of a shroud (1). The first interlocking structure (6) is interlocked with the shoulder. A key (not shown, inserted at 15) is used to interlock a second interlocking structure (9) which is positioned at the periphery of the lid. This second interlocking structure (9) meets the recitation of a lock having a locking member (see Figure 3, for example).

Both interlocking structures have projecting portions that extend below the shoulder (Figure 3).

The key rotates the lock and is insertable at an upper surface of the lid.

The interlocking structures are spaced by about 180 degrees.

Response to Arguments

Applicant's arguments filed January 10, 2005 have been fully considered but they are not persuasive. Applicant's arguments regarding the lock positioned at the periphery are more specific than the claim recitations. Specifically, the claim requires that the lock is positioned at the periphery. Shown in Figures 2 and 3 of Hurlburt, lock portion (9) is shown positioned at the periphery of the lid. That lock portion (16) is not positioned at the periphery is not required, since the lock is made up of a plurality of parts. Since a portion of the lock (again, 9) is positioned at that location, claim recitations are met.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
